Overview of Middle Level CTE

Presented by: Marie Elliott, CTE - FACS educator

Dover Middle/High School

October 17, 2018

Introductions:

Please share the following:

➔ your name and school district
➔ What does Middle Level CTE look like in your district/school?
➔ What CTE options are available to your students in High School?

Middle Level CTE Regulation

In September 2017, the Board of Regents made a permanent revision to **CR 100.4 (c)** as it pertains to CTE:

- 1 ¾ unit "Career and Technical Education"
- Instruction beginning as early as grade 5, and completed by the end of 8th grade
- Teachers certified in any CTE content area

  ~ Agriculture   ~ Business & Marketing

  ~ Family & Consumer Sciences   ~ Health Science

  ~ Technology   ~ Trade & Technical

Without a quality career and technical education system, New York State will not be able to compete in a global marketplace.

18 of the 20 fastest growing occupations within the next decade require technical education.

Curricular Guidance ~

Model & Implementation

NYSED, CTE TAC, & the CTE professional organizations have partnered to develop curricular guidance to be implemented during the 2018 - 2019 school year.

A statewide team of practitioners representing all six CTE content areas drafted two types of modules: Theme Modules and Content Modules.

Theme Modules

➢ Career and Community Opportunities
➢ Communication and Interpersonal Relationships
➢ Financial and Consumer Literacy
➢ Health, Safety, and Wellness
➢ Problem-Solving and Innovation
➢ Sustainability

Theme modules are foundational, cross-content, and standards-based. They represent the basis for middle-level CTE; knowledge and skills that will benefit all students as they move to high school, regardless of the pathway they choose.

Content Modules

Content Modules supply context for the Themes. They are specific to each CTE content area, standards-based, connect middle-level to high school, and are designed for instruction by teachers certified for that content.

27 Content Modules have been developed for use across the 6 content areas.

Because content areas may overlap, educators should explore modules outside their own content area. For example, Entrepreneurship activities are included in the Business Education modules.

Middle-Level CTE Content Modules	Middle-Level CTE Theme Modules					
	Career and Community Opportunities	Communication and Interpersonal Relationships	Financial and Consumer Literacy	Health, Safety, and Wellness	Problem Solving and Innovation	Sustainability
Agriculture (5)	Meaningful Project-Based Learning Experiences					
Business and Marketing (4)						
Family and Consumer Sciences (6)						
Health Science (4)						
Technology (5)						
Trade and Technical (3)						

By 2018, about 63% of all jobs in NYS will require some education and training beyond high school, **including 880,000 that will require certificates.**

That's equal to almost the entire population of the Mid-Hudson Valley.
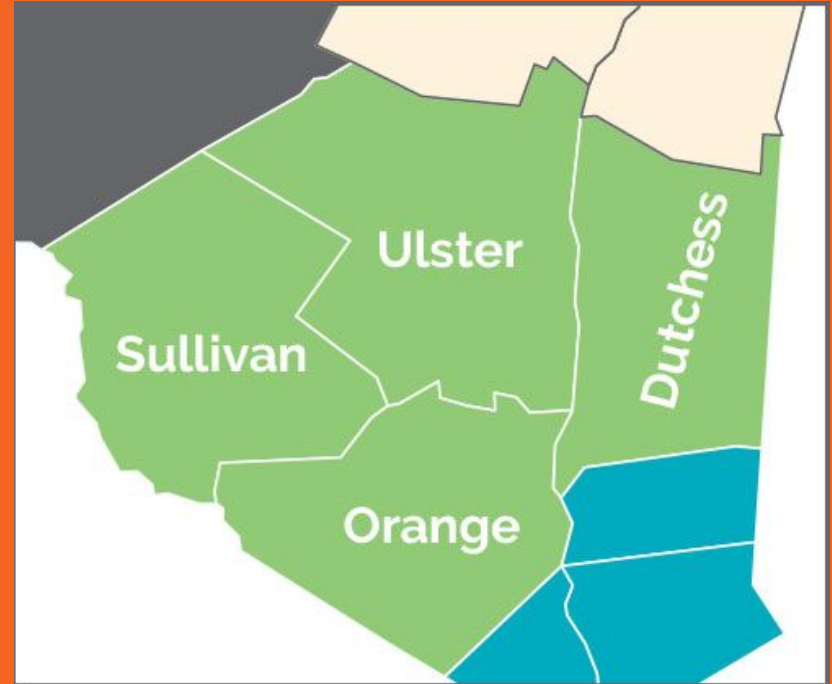

250,000

The approximate number of students enrolled in CTE across the state!

Career Technical Education (CTE) provides students of all ages with the academic and technical skills, knowledge and training necessary to succeed in future careers and to become lifelong learners.
